

MAKE IT EASIER CUSTOMIZING YOUR MAINTENANCE PROCESSES BY CONNECTING CMMS TO INNOVATIVE NO-CODE TECHNOLOGY

IT Departments looking for software solutions can help business units be more efficient and competitive by integrating and deploying the Web & Mobile applications more quickly and safely.

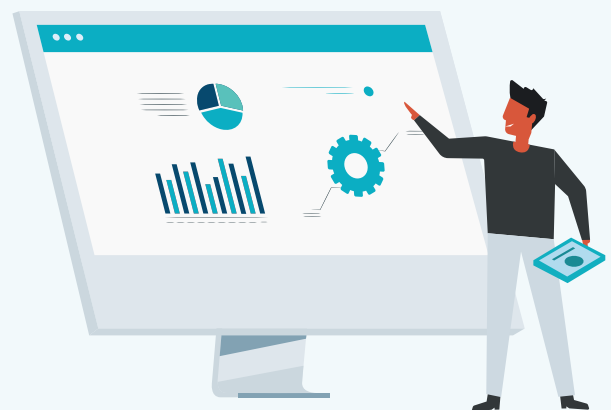

Setting up customized digital processes allows you to stick to the use of your teams. Integrating your processes into the company's IT architecture, without technical complexity or IT knowledge, is a strategic asset.

The benefits provided

Vision technology coupled with a business solution such as DIMO Maint CMMS, offers an explosive combo that allows you to further customize your business processes and integration with other software.

This technological duo allows you to develop and deploy business applications faster, with agility to increase your ROI :

-  **Decrease** in Time To Make
-  Process **customization and optimization**
-  Evolution of the solution **in time easier and agile**
-  Aplicación más **fácil y sencilla**
-  **Concrete reduction** of integration costs
-  **Improvement** of data quality and management

Examples of maintenance use cases

Preparation of work orders

- Creation of a **quality process** complementary to the CMMS maintenance processes
- Creation of a **mobile interface** to prepare a work order from a work request
- **Qualification and precision of requirements** before automatically creating the WO in the CMMS.

Lockout management

- Creation of a mobile application to **dematerialize the consignment processes** previously done on paper
- Release of a process of **discharge of responsibility** for intervention on powered equipment
- Editing and Archiving a PDF **Log Report**
- The process starts with the **targeted equipment** in the database, and involves **up to 3 different profiles** of people before reaching the result.

BIM Management Operation Maintenance

- Creation of **BIM digital models** including data related to assets maintained by CMMS but also data related to the portfolio.
- **Data synchronization** of the digital model with DIMO Maint MX for an up-to-date information system
- Completion of a **work request** from the digital model connected to CMMS
- Retrieving the **history of work orders** directly from the model.

About DIMO Maint

Maintenance Management software for more than 25 years. With 4,000 customers worldwide, DIMO Maint is positioned today as Leader on the CMMS market.

Its scalable range of software that is easy to use and quick to deploy meets the needs of SMEs to international Key Accounts in all business sectors.

About Vision

Vision is the result of Algo'Tech's 23 years of experience in CAD. Vision is based on a stack of innovative technologies (No-Code) integrated, customized, adapted and deployed by TooSmart, business experts specialized in creating business applications for the industry.
