

CMMS SOFTWARE 4.0 FOR MANUFACTURERS

DIMO Maint uses digital technology to improve the performance of your maintenance management

Industrial maintenance plays a strategic role for industrial companies. It aims to ensure the proper functioning of production tools. Its objective is no longer only to "repair", but to maximize the uptime of equipment, while ensuring a sufficient level of safety. It tends to involve technicians before suffering a production stoppage by planning these revisions before and outside the hours of use of the machines.

Perform

Increase the availability and reliability of your equipment by rigorously monitoring your maintenance plan and anticipating breakdowns.

Secure

Control the risks, ensure your regulatory compliance (ISO 22 000, HACCP, FDA, 21 CFR Part 11, ...)

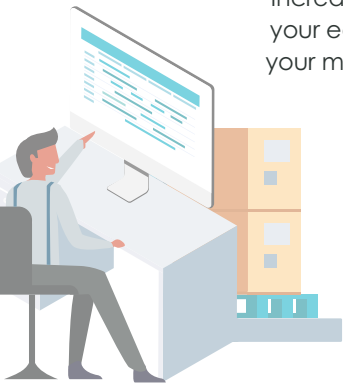

Protect

Preserve human health, the environment and promote the energy transition.

Save

Control direct maintenance costs (asset failures, downtime, resources, ...)

“

In addition to the evolution of mentalities and the valorization of the work carried out by the maintenance department, the implementation of the DIMO Maint solution has made possible to obtain knowledge of all machine breakdowns, the history of the parts used, the implementation of preventive maintenance, the referencing of all suppliers, the association of consumables and parts with several suppliers. The return on investment is mainly measured by the reduction in machine downtime favored by the development of the management of preventive interventions.

Gérald Pigot, deputy maintenance manager at LEONIDAS, Belgian chocolatier

”

DIMO Maint, the CMMS adapted to the needs of industries

The DIMO Maint CMMS provides solutions adapted to the constraints of companies in the industrial sector:

- A **GRAPHICAL TREE** structure that allows you to quickly visualize the strengths and weaknesses of your industrial park
- Efficient **WORK PLANNING**
- A simple and intuitive management of **REQUESTS FOR INTERVENTIONS**, for the most optimized follow-up possible
- Management of **SPARE PARTS** and stock
- A simplified organization of your **PREVENTIVE MAINTENANCE**
- Readable and easily understandable **dashboards** and analytics
- Methodical monitoring of your equipment as part of **PREDICTIVE MAINTENANCE**
- **EASY INTEGRATION** into your industrial information system.

Some of our CMMS Industry customers

Pharma Chemistry

Addiplast Sa
Bayer Sas
Bio Rad
Multibase -Dow
Corning
Sanofi-Aventis
Synkem -
Cordenpharma
Weleda

Food

Bariatric Nutrition
Cafés Liégeois
Confiseries Leonidas
Limagrain
Panzani
Volvic

Mechanics

Technika CMA-CGM
Figeac Aero
Demeca
Ortec

Car

Adient
Comau
Eurofit Group

Other

Turbomeca Groupe
Safran
CPM Bearings
Novemba - Tetra
Pak
Parker Hannifin
