

Your quick start project the CMMS that is **available** and **operational** from 24 hours of remote service

Are you looking to upscale to CMMS software that is **simple, quick to deploy and easy to use** for your mobile technicians?

DIMO Maint MX is an **economical and user-friendly cloud** solution that is easy to use, even for those not experienced in using information technology, meaning they can devote

themselves fully to their core business, namely maintenance. Information can be accessed quickly, and data analysis and sharing has been simplified.

With its **quick start** offer, DIMO Maint can ensure **quick and fully remote deployment** of DIMO Maint MX.

BENEFITS OF A CMMS QUICK START PROJECT

PRICE: the best value for money on the market – currently one third of the price of a standard CMMS offer

This offer frees you from budget limits and enables you to launch your CMMS remotely, without paying for a technician to come to you.

QUICK DEPLOYMENT: you'll be independent and operational from 24 hours with our remote service

On-site projects generally take between 4 and 8 weeks – but you can deploy DIMO Maint MX within 10 days of ordering.

PERSONALISED REMOTE SUPPORT: a proven remote method to get started

To ensure the best follow-up, a single DIMO Maint technician handles your project, from getting started up until you are fully satisfied.

DIMO MAINT MX FUNCTIONAL SCOPE IS TAILORED TO YOUR NEEDS

ASSETS

Complete overview of your assets and full work traceability

WORK

Reliable and effective management of all your corrective, preventive, conditional and regulatory maintenance.

RESOURCES
